Product Code: ALCO-060

Store, Share and Analyse your results using the AlcoLimit® BACtrack mobile breathalyser FREE smartphone application

- Guestimate when your %BAC will return to zero with the Zeroline software
- Store your results and a friend's all in one application
- View a graph of results taken over time
- Log the date and time of each test
- Tag drinks, add photos and notes to each reading
- Share results with friends on Facebook and Twitter!

The date, time and location of your results can be recorded with AlcoLimit® BACtrack Mobile Breathalyser's Worldview® software.

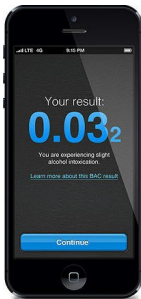

How it Works

Simply press the ON/OFF button to connect your AlcoLimit® BACtrack Smartphone Mobile Breathalyser to your mobile device or Apple Watch via Bluetooth.

Blow into your AlcoLimit® BACtrack Smartphone Mobile Breathalyser until the software tells you to stop.

Your Blood Alcohol Concentration (%BAC) will appear on the display within seconds providing 3 decimal place accuracy!

AlcoLimit® BACtrack Smartphone Mobile Breathalyser app will also provide information about how the alcohol is affecting your body enabling you to understand in more detail.

Best Apps of the Week: "Connect the device through Bluetooth and quickly and accurately estimate your blood alcohol level."

"At the top of the line is the BACtrack Mobile Breathalyzer. Besides the standard features, this gadget provides...an estimate of how long until you're sober."

"If you're going to shell out for a breathalyser, you might as well make it accurate. This one uses fuel cell sensors, the preferred breathalyser tech used by law enforcement..."
